A-2703	SERVER-MAIL Phishing attempt possible download of malware	Medium	The user may have opened a malicious email and opened attachments or clicked links.	Escalated

Ticket comments
We are escalating this up to soc level 2 because we know this email has malicious intent after we plugged the hash into virustool.com. We need to regularly update these employees here about phishing attempts a make sure they are aware that they know what one looks like, and not how important it is to not open one of these emails. We are also weary of this email because of the spelling and grammatical errors.

Additional information

Known malicious file hash:
